

NECS launches our New Managed Print Services Program

NECS will help revolutionize the way you manage your fleet of printers.

NECS is proud to announce that we have launched our new managed print services programs. NECS brings 40+ years of industry expertise, providing unsurpassed customer care and services to over 15,000 clients in all types of organizations.

NECS' Managed Print Services Programs will simplify the often complex task of managing the printing infrastructure in your environment. Our consultative approach and processes will help your organization better monitor, manage and control the costs associated with your printing infrastructure with our customized fleet management programs that will give you peace of mind.

OUR PROCESS

EVALUATE – NECS will evaluate the current methods for the management of the printing infrastructure to determine your true costs. Our assessment tool **NECS MONITOR** will assess your current print environment & document workflow. It involves gathering data on page volumes per device and the mapping out of devices throughout your organization.

ANALYZE – Analysis of the data gathered in order to develop a customized strategy that will help you to achieve a more efficient printing infrastructure.

RECOMMEND – Our practical recommendations will enhance performance efficiency and cost savings. NECS develops a roadmap that will manage and optimize your printing environment.

MANAGE – The customized proactive program provided to your organization by NECS will help you to better manage and optimize the printer fleet with detailed reports and tracking.

CONTROL – Control your costs with an NECS Managed Print Services Program

BENEFITS – Based on recent industry surveys these are some of the benefits your organization could achieve with a Managed Print Services program.

- 23% average overall cost savings
- 40% reduction in IT help desk calls
- 25% cost reduction in consumables
- 20% cost reduction in unscheduled maintenance
- 10% cost reduction in installation and upgrades
- 5% cost reduction in acquisition
